

COURSE PROGRAM: PROFESSIONAL RECRUITMENT SPECIALIST

Deep Web & GitHub Tech Sourcing

BATCH COHORT

Professional Recruitment Specialist —
Weekday Evening Cohort (Sept 2026)

LEAD INSTRUCTOR

Shesha Shhiv Mohanty

SCHEDULE & TIMING

Mon, 05 Oct, 2026

08:00 pm - 09:30 pm IST

01 Learning Objectives & Target Capabilities

Core competencies attendees master upon completing this session

- ✓ Master Boolean logic, Naukri Resdex, and LinkedIn search.
- ✓ Master practical, industry-standard execution of Deep Web & GitHub Tech Sourcing.
- ✓ Apply hands-on recruitment workflows from sourcing, screening to candidate closing.
- ✓ Identify common recruitment bottlenecks and optimize hiring turnaround times (TAT).

02 Detailed Syllabus Topics & Curriculum Breakdown

Step-by-step modular components covered in this session

Core Syllabus Topics

- JD Analysis
- Boolean operators
- Resume screening
- Portal search optimization

03 Trainer Teaching Notes & Paced Talking Points

Chronological 120-minute delivery framework with talking points

PEDAGOGICAL GUIDANCE FOR TRAINER:

Follow this 4-stage delivery timeline. Balance conceptual delivery with live screen-sharing and student interaction.

15 MINS

Opening & Context Setting

- ▶ Welcome students and link today's session on "Deep Web & GitHub Tech Sourcing" to the broader recruitment lifecycle.
- ▶ Poll the cohort: "How many of you have faced friction or candidate drop-offs at this stage?"
- ▶ State the concrete business outcome: how mastering this makes a recruiter 3x more productive and hire-ready.

45 MINS

Deep-Dive Concept Delivery & Frameworks

- ▶ Walk through the step-by-step workflow for Core Syllabus Topics.
- ▶ Demonstrate real-time screen sharing: live Boolean strings, intake forms, or ATS pipeline configuration.
- ▶ Contrast junior vs. senior recruiter methods: highlight how high-performers avoid time-wasting traps.

35 MINS

Live Demonstration & Student Walkthrough

- ▶ Execute a live mock demonstration using real candidate profiles or job descriptions.
- ▶ Call on 2-3 students to suggest search parameters or candidate objection responses in real time.
- ▶ Emphasize compliance, candidate experience, and metric tracking (Submittal-to-Interview ratio).

25 MINS

Hands-on Activity, Q&A & Wrap-Up

- ▶ Assign the practical exercise below; give students 15 minutes of structured practice.
- ▶ Review 2 volunteer submissions and provide immediate tactical critique.
- ▶ Announce the attendance-gated assignment/assessment and key action items before next class.

04

Key Concepts & Industry Case Studies

Applied talent acquisition frameworks & verified corporate benchmarks

High-Impact Candidate Conversion & Intake Calibration

Recruiting speed is determined in the first 48 hours. Calibrating the exact must-haves versus good-to-haves with hiring managers prevents weeks of futile sourcing.

REAL-WORLD CASE STUDY & METRIC BENCHMARK:

Case Study: A fast-growing tech startup reduced their Time-to-Fill from 42 days to 16 days by implementing 15-minute calibration intake sheets and 3 benchmark profiles before starting active outreach.

Predictive Screening & Eliminating Offer Dropouts

Assessing intent, compensation expectations, and competing offers during early stages ensures only high-probability candidates reach the offer table.

REAL-WORLD CASE STUDY & METRIC BENCHMARK:

Case Study: Enterprise IT services firm increased joining ratio from 68% to 89% by embedding counter-offer risk audits and transparent notice period buy-out protocols during initial screening calls.

05

Practical Classroom Activities & Exercises

Direct classroom simulations and portfolio artifacts

Hands-on Lab: Deep Web & GitHub Tech Sourcing Live Execution

Instructions: Using the provided job specification / scenario, build the complete deliverable: JD Analysis, Boolean operators, Resume screening.

Tangible Deliverable: Screen 100 profiles and shortlist 15 candidates meeting JD requirements.

06

Recommended Recruitment Software & Tech Stack

Enterprise-grade recruiting tools utilized during this session

Naukri Recruiter

Daily recruiter operations & efficiency

Portals

LinkedIn Search

Daily recruiter operations & efficiency

Sourcing

Google Workspace for HR

Daily recruiter operations & efficiency

Operations

07

Check-for-Understanding & Discussion Prompts

Oral viva check and critical scenario analysis

Q1

What are the top 3 failure points when recruiters execute "Deep Web & GitHub Tech Sourcing", and how do you mitigate them?

Q2

How do you adjust your recruitment strategy when candidate response rate drops below 15%?

Q3

Explain how to measure Return on Effort (ROE) between active outbound sourcing vs. inbound portal applicants.

Q4

Role-play question: How would you handle a hiring manager who insists on unrealistic candidate criteria for an urgent requisition?

08

Session Summary & Post-Class Action Items

Core takeaways and mandatory preparation before next session

- ✓ Consistency in execution is what separates average recruiters from top 1% executive talent specialists.
- ✓ Always document your candidate communication trail, objection handling points, and submittal feedback in the ATS.
- ✓ Complete today's practical assignment and submit it via your student portal before the next live session.
