

Corporate Recruitment Training

SESSION 1 | SYLLABUS & TRAINER TEACHING GUIDE

Session 1: Custom In-House Sourcing & Boolean Mastery

Batch: Corporate Recruitment Training — Enterprise TA Capability Cohort (Sept 2026) | Lead Trainer: Shesha Shhiv Mohanty | Sun, 02 Aug, 2026 (07:00 pm - 09:00 pm IST)

01 Learning Objectives & Session Outcomes

Core competencies attendees master upon completing this session

- ✓ Upgrade in-house recruiters with cutting-edge talent intelligence and Boolean mastery.
- ✓ Master practical, industry-standard execution of Custom In-House Sourcing & Boolean Mastery.
- ✓ Apply hands-on recruitment workflows from sourcing, screening to candidate closing.
- ✓ Identify common recruitment bottlenecks and optimize hiring turnaround times (TAT).

02 Detailed Syllabus Topics & Curriculum Breakdown

Step-by-step modular components covered in this session

Module 1: Core Concepts

- Multi-channel passive candidate sourcing for enterprise hiring needs
- Advanced Boolean logic tailored to company-specific target profiles
- Optimizing recruiter outreach and reducing agency dependency

03 Trainer Teaching Notes & Paced Talking Points

Chronological 120-minute delivery framework with talking points

PEDAGOGICAL GUIDANCE FOR TRAINER:

Follow this 4-stage pacing model. Balance conceptual clarity with live screen-sharing and student role-plays.

15 MINS

Opening & Context Setting

- ▶ Welcome students and link today's session on "Custom In-House Sourcing & Boolean Mastery" to the broader recruitment lifecycle.
- ▶ Poll the cohort: "How many of you have faced friction or drops at this specific hiring stage?"
- ▶ State the concrete business outcome: how mastering this makes a recruiter 3x more productive and hire-ready.

45 MINS

Deep-Dive Concept Delivery & Frameworks

- ▶ Walk through the step-by-step workflow for Module 1: Core Concepts.
- ▶ Demonstrate real-time screen sharing: live Boolean strings, intake forms, or ATS pipeline configuration.
- ▶ Contrast junior vs. senior recruiter methods: highlight how high-performers avoid time-wasting traps.

35 MINS

Live Demonstration & Student Walkthrough

- ▶ Execute a live mock demonstration using real candidate profiles or job descriptions.
- ▶ Call on 2-3 students to suggest search parameters or candidate objection responses in real time.
- ▶ Emphasize compliance, candidate experience, and metric tracking (Submittal-to-Interview ratio).

25 MINS

Hands-on Activity, Q&A & Wrap-Up

- ▶ Assign the practical exercise below; give students 15 minutes of structured practice.
- ▶ Review 2 volunteer submissions and provide immediate tactical critique.
- ▶ Announce the attendance-gated assignment/assessment and key action items before next class.

04

Key Concepts & Industry Case Studies

Applied talent acquisition frameworks & corporate hiring benchmarks

High-Impact Candidate Conversion & Intake Calibration
Recruiting speed is determined in the first 48 hours. Calibrating the exact must-haves versus good-to-haves with hiring managers prevents weeks of futile sourcing.

CASE STUDY BENCHMARK:
Case Study: A fast-growing tech startup reduced their Time-to-Fill from 42 days to 16 days by implementing 15-minute calibration intake sheets and 3 benchmark profiles before starting active outreach.

Predictive Screening & Eliminating Offer Dropouts
Assessing intent, compensation expectations, and competing offers during early stages ensures only high-probability candidates reach the offer table.

CASE STUDY BENCHMARK:
Case Study: Enterprise IT services firm increased joining ratio from 68% to 89% by embedding counter-offer risk audits and transparent notice period buy-out protocols during initial screening calls.

05

Practical Classroom Activities & Exercises

Direct classroom simulations and portfolio artifacts

Hands-on Lab: Custom In-House Sourcing & Boolean Mastery Live Execution
Instructions: Using the provided job specification / scenario, build the complete deliverable: Multi-channel passive candidate sourcing for enterprise hiring needs. Advanced Boolean logic tailored to company-specific target profiles, Optimizing recruiter outreach and reducing agency dependency.
Deliverable: Execute high-speed talent mapping for current open requisitions.

06

Recommended Recruitment Software & Tech Stack

Enterprise-grade recruiting tools utilized during this session

Enterprise ATS & CRM
Hiring Operations
Daily recruiter operations & efficiency

AI Sourcing Accelerators
Automation
Daily recruiter operations & efficiency

Talent Analytics Dashboards
Recruitment BI
Daily recruiter operations & efficiency

LinkedIn Talent Insights
Market Intelligence
Daily recruiter operations & efficiency

07

Check-for-Understanding & Discussion Prompts

Oral viva check and critical scenario analysis

- Q1. What are the top 3 failure points when recruiters execute "Custom In-House Sourcing & Boolean Mastery", and how do you mitigate them?
- Q2. How do you adjust your recruitment strategy when candidate response rate drops below 15%?
- Q3. Explain how to measure Return on Effort (ROE) between active outbound sourcing vs. inbound portal applicants.
- Q4. Role-play question: How would you handle a hiring manager who insists on unrealistic candidate criteria for an urgent requisition?

08

Session Summary & Post-Class Action Items

Core takeaways and mandatory preparation before next session

- ✓ Consistency in execution is what separates average recruiters from top 1% executive talent specialists.
- ✓ Always document your candidate communication trail, objection handling points, and submittal feedback in the ATS.
- ✓ Complete today's practical assignment and submit it via your student portal before the next live session.
