

Corporate Recruitment Training

SESSION 1 SYLLABUS & TRAINER TEACHING GUIDE

Corporate Sourcing Audit & Boolean Optimization Workshop

Batch: Corporate Recruitment Training — Enterprise TA Capability Cohort (Sept 2026) | Lead Trainer: Shesha Shhiv Mohanty | Schedule: Mon, 07 Sept, 2026 (10:00 am – 01:00 pm IST)

01 Learning Objectives & Session Outcomes

By the end of this session, attendees will have mastered the following practical capabilities and industry frameworks:

- Upgrade in-house recruiters with cutting-edge talent intelligence and Boolean mastery.
- Master practical, industry-standard execution of Corporate Sourcing Audit & Boolean Optimization Workshop.
- Apply hands-on recruitment workflows from sourcing, screening to candidate closing.
- Identify common recruitment bottlenecks and optimize hiring turnaround times (TAT).

02 Detailed Syllabus Topics & Curriculum Breakdown

• Core Syllabus Topics

- Advanced Boolean & Semantic AI search
- Mapping Competitor Talent Pools
- Diversity & Inclusion (D&I) Sourcing

03 Trainer Teaching Notes & Paced Talking Points

Trainer Guidance: Follow this structured 2-hour pacing model to balance conceptual clarity with practical hands-on application.

Segment [15 Mins]: Opening & Context Setting

%¶¶

Welcome students and link today's session on "Corporate Sourcing Audit & Boolean Optimization Workshop" to the broader recruitment lifecycle.

%¶¶

Poll the cohort: "How many of you have faced friction or drops at this specific hiring stage?"

%¶¶

State the concrete business outcome: how mastering this makes a recruiter 3x more productive and hire-ready.

Segment [45 Mins]: Deep-Dive Concept Delivery & Frameworks

%¶¶

Walk through the step-by-step workflow for Core Syllabus Topics.

%¶¶

Demonstrate real-time screen sharing: live Boolean strings, intake forms, or ATS pipeline configuration.

%¶

Contrast junior vs. senior recruiter methods: highlight how high-performers avoid time-wasting traps.

Segment [35 Mins]: Live Demonstration & Student Walkthrough

%¶

Execute a live mock demonstration using real candidate profiles or job descriptions.

%¶

Call on 2-3 students to suggest search parameters or candidate objection responses in real time.

%¶

Emphasize compliance, candidate experience, and metric tracking (Submittal-to-Interview ratio).

Segment [25 Mins]: Hands-on Activity, Q&A & Wrap-Up

%¶

Assign the practical exercise below; give students 15 minutes of structured practice.

%¶

Review 2 volunteer submissions and provide immediate tactical critique.

%¶

Announce the attendance-gated assignment/assessment and key action items before next class.

04 Key Concepts, Case Studies & Real-World Scenarios

High-Impact Candidate Conversion & Intake Calibration

Recruiting speed is determined in the first 48 hours. Calibrating the exact must-haves versus good-to-haves with hiring managers prevents weeks of futile sourcing.

INDUSTRY EXAMPLE & CASE STUDY:

Case Study: A fast-growing tech startup reduced their Time-to-Fill from 42 days to 16 days by implementing 15-minute calibration intake sheets and 3 benchmark profiles before starting active outreach.

Predictive Screening & Eliminating Offer Dropouts

Assessing intent, compensation expectations, and competing offers during early stages ensures only high-probability candidates reach the offer table.

INDUSTRY EXAMPLE & CASE STUDY:

Case Study: Enterprise IT services firm increased joining ratio from 68% to 89% by embedding counter-offer risk audits and transparent notice period buy-out protocols during initial screening calls.

05 Practical Classroom Activities & Exercises

&j Hands-on Lab: Corporate Sourcing Audit & Boolean Optimization Workshop Live Execution

Instructions: Using the provided job specification / scenario, build the complete deliverable: Advanced Boolean & Semantic AI search, Mapping Competitor Talent Pools, Diversity & Inclusion (D&I) Sourcing.

Deliverable: Execute high-speed talent mapping for current open requisitions.

07 Check-for-Understanding & Discussion Prompts

Q1.

What are the top 3 failure points when recruiters execute "Corporate Sourcing Audit & Boolean Optimization Workshop", and how do you mitigate them?

Q2.

How do you adjust your recruitment strategy when candidate response rate drops below 15%?

Q3.

Explain how to measure Return on Effort (ROE) between active outbound sourcing vs. inbound portal applicants.

Q4.

Role-play question: How would you handle a hiring manager who insists on unrealistic candidate criteria for an urgent requisition?

08 Session Summary & Post-Class Action Items

- Consistency in execution is what separates average recruiters from top 1% executive talent specialists.
- Always document your candidate communication trail, objection handling points, and submittal feedback in the ATS.
- Complete today's practical assignment and submit it via your student portal before the next live session.
